Energy Tax Credit Up To

**\$1,500<sup>00</sup>**

**Lowest  
Prices  
Ever**

**Take Advantage...NOW!**

The new law increases the code sec. 25 residential energy property tax credit from 10% to 30% and raises the maximum cap to \$1,500 for 2009 and 2010

**BEWARE!!**

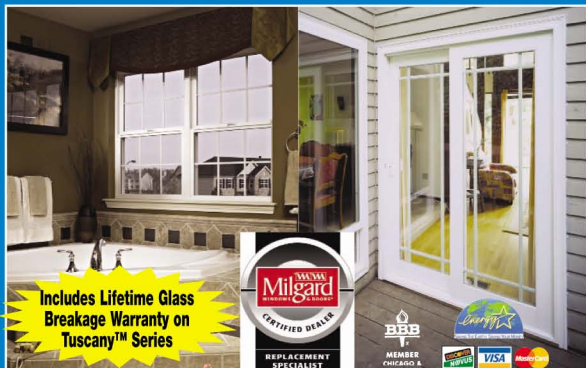

Not all EnergyStar labeled windows qualify for this tax credit! To qualify, the window must have a U-value equal to or less than .30 and a SHGC equal to or less than .30. Just because a product has the EnergyStar label, it does not mean it qualifies for the tax credit.

**Key Elements of the Program**

- 30% of the amount paid or incurred by the taxpayer for qualified energy efficient improvements installed during 2009 and 2010
- Up to \$1,500 maximum credit for energy efficient improvements for all taxable years
- Allowed only for amounts paid or incurred to purchase the window or door.
- Must be for taxpayers principal residence.
